

July 18th, 2014

Dear Dr. and Prof. Lian-Sheng Ma, President and Company Editor-in-Chief of World Journal of Gastroenterology

At first, we would like to express our thanks to the editors and reviewers for their hard works and many valuable comments.

We have submitted a revised manuscript for *World Journal of Gastroenterology*, newly entitled “R1: **Coincidence between malignant PEComa arising in the gastric serosa and lung adenocarcinoma**” (ESPS Manuscript NO: 11480), and its paper may be acceptable with substantial change. Thus, I have extensively re-written the revised version as soon as possible.

This manuscript has not been published elsewhere and is not under consideration by another journal. All authors have approved the manuscript. We are looking forward to hearing from you at your earliest convenience.

Thank you so much.

Yours faithfully,

Sohsuke Yamada, MD, PhD.
