

## **LETTER TO THE REVIEWERS**

Name of journal: *World Journal of Clinical Urology*

ESPS Manuscript NO: 11580

### **Reviewer 00503511**

**First of all, I would like to thanks for the suggestions. I think all of them were helpful and improved the quality of the paper. I have added some suggested papers to the review and some considerations about iPS cells and SUI. Regarding minor points, all of them have been corrected.**

### **Reviewer 00505327**

**First of all, I would like to thanks for the suggestions. We have put some complimentary data with regards iPS cells and its potential to treat SUI, as well as immunological aspects of cell therapy. Based on the current literature, autologous ADSC and MDSC are the most common used cell type to treat SUI; however, further studies are still necessary in order to demonstrate its long-term effectiveness. So far it has not been established the mechanism of action of different cell sources on tissue repair. In fact, there is a lot of controversies in this field.**

### **Reviewer 00742243**

**I would like to thank you for your comments.**
