Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 11956 revised manuscript.doc).

Title: Effectiveness of a Passive-Bending, Short type Single Balloon Enteroscope for ERCP in Patients with a Roux-en-Y Anastomosis

Author: Hiroshi Yamauchi, Mitsuhiro Kida, Kosuke Okuwaki, Shuko Tokunaga, Shiro Miyazawa, Tomohisa Iwai, Miyoko Takezawa, Hiroshi Imaizumi, Wasaburo Koizumi

Name of Journal: *World Journal of Gastroenterology*

ESPS Manuscript NO: 11956

The manuscript has been improved according to the suggestions of reviewers:

Revision has been made according to the suggestions of the reviewer

1. Balloon endoscope listed that it was useful as a pancreato-biliary endoscope in Introduction, but originally the balloon endoscope was used because Yamamoto and others observed a small intestine lesion. It is thought that one listing the history for the balloon endoscope is preferable.

Answer: We added the following contents.

Long type Double-balloon enteroscope was introduced by Yamamoto et al. for the purpose of diagnosis and treatment of small intestine. First report of DBE-assited ERCP was reported by Haruta et al. in patients with Roux-en-Y hepaticojejunostomy after liver transplantation.

2. Please correct it in Key words Roux-en-Y → Roux-en-Y anastomosis.

Answer: We changed Key word to Roux-en-Y anastomosis from Roux-en-Y.

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

Hiroshi Yamauchi, M.D.
