Title: Literature review on the management of diabetic foot ulcer

Author: Leila Yazdanpanah, Morteza Nasiri, Sara Adarvishi

Name of Journal: *World Journal of Diabetes Research*

ESPS Manuscript NO: 12350

The manuscript has been improved according to the suggestions of reviewers:

- 1 We edited the final manuscript by someone whose primary language was English.
- 2 We omitted the last sentence of abstract ("However, these procedures...") to be more understandable.
- 3 We added a brief Methods section and described how the literature was searched (parameters) and how we selected papers for inclusion.
- 4 We changed several references that weren't cited as primary references.
- 5 In section of "Etiology of diabetic foot ulcer" we added a few sentences, and discussed about pressure and gait as well as traumatic injuries as a source of DFU development.
- 6 In "debridement", "Offloading" and "Hyperbaric oxygen therapy" sections we added recent studies that were suggested.
- 7 We omitted the reference to the VAC.
- 8 We revised all the manuscript based on the Revision Policies of BPG for Review.
- 9 We checked the manuscript thoroughly, and confirm that all the references are properly cited.

Thank you again for publishing our manuscript in the *World Journal of Diabetes Research*.

Sincerely yours,
