**Title: Acute necrotizing pancreatitis: Surgical indications and technical procedures**

**Author:** José Manuel Aranda-Narváez, Antonio Jesús González-Sánchez, María Custodia Montiel-Casado, Alberto Titos-García, Julio Santoyo-Santoyo.

**Name of Journal:** *World Journal of Clinical Cases*

**ESPS Manuscript NO:** 12364

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated (according with the comments of the Editor).

2 Revision has been made according to the suggestions of the reviewers:

(1) The first reviewer perhaps considered the manuscript as an original paper, and didn't take into account that it was not, it was a minireview performed under invitation. So his comments have not been considered for review.

(2) The second reviewer performed great comments with respect to the manuscript. We agree absolutely with all of them, but they're all directed towards clinical aspects that are considered and extensively developed in the manuscript (consideration of the indication and the procedure depending on the patient and the extension of the pancreatic necrosis, necessity of multidisciplinary approach...).

3 References and typesetting were corrected (PMID and DOI have been added to all references).

since her collaboration cannot be considered
