

August 26, 2014

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 12451-review.doc).

Title: Computed Tomography Attenuation Values of Ascites are Helpful to Predict Perforation Site

Author: Ryo Seishima, Koji Okabayashi, Hirotoishi Hasegawa, Masashi Tsuruta, Hiroki Hoshino, Toru Yamada, Yuko Kitagawa

Name of Journal: *World Journal of Gastroenterology*

ESPS Manuscript NO: 12451

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

(1) Comparison between CT value of ascites and traditional signs in determining perforation sites is suggested to be added to the manuscript by the reviewer. Although we have already showed the data in Table 4, no description was in the manuscript. According to the suggestion, we added the explanation of comparison data of prediction rates in Result, and highlighted by red font.

3 References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

Koji Okabayashi, MD
