

September 11, 2014

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 12569-revised.doc).

Title: Portal hypertension induced by congenital hepatic arterioportal fistula: Report of four clinical cases and review of the literature

Author: Danying Zhang, Shuqiang Weng, Ling Dong, Xizhong Shen

Name of Journal: *World Journal of Gastroenterology*

ESPS Manuscript NO: 12569

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

(1) I have illustrated the treatment of patient 4 and the prognosis of patient 2-4.

(2) Typo error have been corrected.

(3) I have added a table about the main findings of the four cases. But I haven't make a table about the 35 reported cases according to all reference, because the same table existed in the reference "R.Sutcliffe, G.Mieli-Vergani, et al. A novel treatment of congenital hepatoportal arteriovenous fistula, 2008, 43, 571-573". If it is necessary, I will add the table.

(4) A clear description of the time of follow-up after embolization has been added in the manuscript.

3 References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

Gastroenterology of Zhongshan Hospital, Fudan University, Shanghai 200032, China
