(1) Reviewer (245875), thank you for considering our manuscript. We believe having a control would strengthen our case for the success of the RADPLAT protocol in treating SNUC. Although we do not present controls, we believe our extensive review of the literature on various treatment modalities (consisting of non-RADPLAT protocols) provides evidence for the potential of RADPLAT in treating SNUC.

3 References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Clinical Cases*.

Sincerely yours,
