

**Prolonged hyponatremia triggered by hyperglycemic hyperosmolar state with coma:
A case report**

Short title: Nephrogenic diabetes insipidus triggered by HHS

Darlene Vigil, Nephrology Section, Medicine Service, Raymond G. Murphy Veterans
Affairs Medical Center, Albuquerque, New Mexico

The above referenced case study has been reviewed by New Mexico VA Health Care System Privacy Officer and it was verified that no personally identifiable information is contained within this document as submitted for publication. No consent from the patient is required as per VA guidance on case reports, as this case report is educational in nature and does not contain sensitive personal information. Therefore, a HIPAA authorization is not required as the information in the case report does not allow the reader to identify the person. The case report contains only de-identified information that totally conceals the identity of the individual.
