The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

(1) I have got a native English speaker to check the English used in the paper.

(2) The characteristics of the patients are described such as age, sex, Child-Pugh and MELD score in abstract and material.

(3) The abbreviation of DSA has been extended.

(4) The introduction section is well elaborated and the aim of the study is better elucidated. The utility of C-arm lipiodol CT in small HCC was stressed.

(5) The statistical procedure used for the analysis was depicted in paired *t*-test. And the data of AFP value was distributed normally through analysis by SPSS software.

(6) For table 1, the legend has been changed, and the abbreviation of AFP and TACE has been extended. The contents of table 1 were depicted in detail.

(7) The limitations of this study were illustrated in the last part of discussion.

3 References and typesetting were corrected
