2 Revision has been made according to the suggestions of the reviewer

Reviewer 1

I would recommend a couple of grammatical fixes and suggestions: 1) Page 5 "The most important renal guidelines" spelling correction - advice, not advise 2) Page 8 please clarify sentence: "Haematuria has been classically considered a marker of activity in ANCA vasculitis, although a recent report showed impact of persistent haematuria (determined by dipstick) on GFR at 1 year of follow-up.

We thank the referee for the constructive comments that have helped to improve the quality of the manuscript. According to the Reviewer's comment we have changed grammatical errors and clarify the sentence on page 8.

3 References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Nephrology*.
