The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

(1) the abstract needs more details

(2) the description of absence of symptoms should be avoided and only the occurring symptoms should be reported;

(3) the term "postero" for aortic arch anastomosis is not clear; please, provide a better definition;

We used "supra- aortic arch anastomoses" instead of "supra- postero aortic arch anastomoses". We thought they should express the same meaning. Obviously, we are wrong. So, we used "supra-aortic arch anastomoses" instead of "supra- postero aortic arch anastomoses".

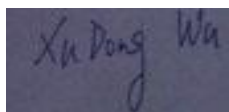

(4) all the text needs an accurate English language revision
