Retrospective Clinical Study

Catheter ablation for atrial fibrillation in a subset of patients with concomitant hypertension

Tushar Sharma, Benjamin J Scherlag, Hiroshi Nakagawa, Warren M Jackman, Ralph Lazzara, Sunny S Po

STATISTICAL ANALYSIS

Statistical analyses were done using the SAS software (V 9.1). All statistical tests were carried out at an alpha of 0.05. Data is expressed as mean \pm standard deviation (SD). Repeated measures analysis of variance (ANOVA) was used to determine if the mean SBP and DBP changed over the follow up periods for the two groups. Post-hoc analysis was done to compare the mean blood pressures across the individual follow up periods.

Dr. Tushar Sharma, MD, MPH-received his Master's Degree in Epidemiology and Bio-Statistics at the College of Health at the University of Oklahoma Health Sciences Center, Oklahoma City, OK, USA
