Reviewer #1

This is a well written meta-analysis which confirms with PRISMA guidelines. I only have two small comments: 1. There should be an explanation provided as to why conclusions were different from historical meta-analysis 2. Heading sensibility should read sensitivity.

Response to Reviewer #1

We appreciate the feed-back from Reviewer #1, thanks for the kind suggestions.

1. In the revised manuscript, we provided explanations on the aspect that why conclusions of the present study were different historical meta-analysis.
2. So sorry for our carelessness, the word was changed to "sensitivity".

Reviewer #2

General: Interesting topic, very well presented. Flow of language: acceptable Title: suitable Text structure and content: both are adequate The reference list: adequate.

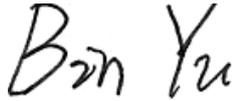

Response to Reviewer #2

We thank Reviewer #2 for his encouraging and positive comments on our manuscript.
