

February 5, 2015

Dear Editor,

On behalf of my co-authors, I thank you very much for giving us an opportunity to revise our manuscript entitled "Citric deficiency presenting as acute liver failure in an 8-month-old infant". (ID: 15049). We also appreciate the reviewers very much for their positive and constructive comments and suggestions.

We have studied reviewer's comments very carefully and have revised our manuscript accordingly. Format has been updated and language has been improved by a professional English language editing company recommended by the Journal. Please find enclosed the edited manuscript in Word format (file name: 15049-edited.doc), which we would like to submit for your kind consideration to publish in the *World Journal of Gastroenterology*. Following you may also find the information of the manuscript and the answer to reviewers one by one.

Thanks again and looking forward to your further positive decision.

With my warmest regards.

Sincerely yours,

Meihong Zhang

Manuscript information:

Title: Citric deficiency presenting as acute liver failure in an apparently healthy 8-month-old infant

A case report

Authors: Mei-Hong Zhang, Jing-Yu Gong, Jian-She Wang

Name of Journal: *World Journal of Gastroenterology*

ESPS Manuscript NO: 15049

Answer to reviewers:

(1) Response to Reviewer No. 2440657:

Thanks for your constructive comments and revision has been made accordingly. In the discussion session, we reviewed the cases that developed to end-stage liver disease in the literature and compared them to our case. The errors of grammar had also been checked and revised by a professional English language editing company recommended by the Journal.

(2)Response to Reviewer No. 2937613

Thanks for your advice. Language had been improved by a professional English language editing company recommended by the Journal. Our core tip is that citrin deficiency can also present as acute liver failure triggered by infection in apparently healthy late infancy. We had revised our core tip as well. The case you mentioned was reviewed and compared to our case in the discussion section.

(3)Response to Reviewer No. 2944212

A lot of gratitude for your very positive comments on our paper.
