National Diabetes Statistics Report, 2014

Estimates of Diabetes and Its Burden in the United States

“This document is intended to provide up-to-date scientific data and statistics on diabetes and its burden in the United States. Formerly referred to as the National Diabetes Fact Sheet, this consensus document is written for a scientific audience.”

FAST FACTS ON DIABETES

29.1 million people or 9.3% of the U.S. population have diabetes.

DIAGNOSED
21.0 million people

UNDIAGNOSED
8.1 million people
(27.8% of people with diabetes are undiagnosed).

AI ages_2012

Diagnosed and undiagnosed diabetes among people aged 20 years or older, United States, 2012

	Number with diabetes (millions)	Percentage with diabetes (unadjusted)
Total		
20 years or older	28.9	12.3
By age		
20–44	4.3	4.1
45–64	13.4	16.2
65 years or older	11.2	25.9
By sex		
Men	15.5	13.6
Women	13.4	11.2

The Asian Population: 2010

2010 Census Briefs

Issued March 2012

C2010BA-11

INTRODUCTION

According to the 2010 Census, the Asian population grew faster than any other race group in the United States between 2000 and 2010. This was observed for the population who reported Asian alone (increased 43 percent), as well as for the population who reported Asian alone or in combination with another race (increased 45 percent). The Asian population continued to be concentrated in the West, and the Chinese population was the largest detailed Asian group.

This report provides a portrait of the Asian population in the United States and discusses that population's distribution at the national level and at lower levels of geography.¹ It is part of a series that analyzes population and housing data collected from the 2010 Census.

The data for this report are based on the *2010 Census Redistricting Data (Public Law 94-171) Summary File*, which was the first 2010 Census data product released with data on race and Hispanic origin, including information on the Asian population, and was provided to each state for use in drawing boundaries for legislative districts.² Data for this report also come from the *2010 Census Summary File 1*, which was one of the first 2010 Census

¹ This report discusses data for the 50 states and the District of Columbia, but not Puerto Rico.

² Information on the *2010 Census Redistricting Data (Public Law 94-171) Summary File* is available online at <http://2010.census.gov/2010census/data/redistricting-data.php>.

data products to provide information on selected detailed groups, such as Asian Indians, Koreans, and Filipinos.³

UNDERSTANDING RACE DATA FROM THE 2010 CENSUS

The 2010 Census used federal standards to collect and present data on race.

For the 2010 Census, the question on race was asked of individuals living in the United States (see Figure 1). An individual's response to the race question was based upon self-identification. The U.S. Census Bureau collects information on race following the guidance of the U.S. Office of Management and Budget's (OMB)

³ Information on the *2010 Census Summary File 1* is available online at <http://2010.census.gov/news/press-kits/summary-file-1.html>.
