

January 28th 2015

Dear Editor

Please find enclosed the edited manuscript in Word format (file name: 15633-edited.docx).

**Title:** Psychological themes that influence self-management of Type 1 diabetes

**Author:** Clare Shaban

**Name of Journal:** World Journal of Diabetes

**ESPS Manuscript No:** 15633

The manuscript has been improved according to the suggestions of reviewers:

1. Format has been updated to include a running title, keywords and core tip.
2. Revisions have been made according to the reviewers
  1. The word 'theme' has been replaced by 'issues' and 'factors' in most instances throughout the text.
  2. BMG has been written in full before the abbreviation in the abstract.
  3. The abstract has been modified slightly so that it differs from the first paragraph of the introduction.
  4. Hyphenation has been added where appropriate throughout the text.
  5. I have changed the title of Figure 1 so that it links more clearly to the text and added a key. I agree with the reviewer that the psychological issues could apply to other long-term conditions, however in this situation they are linked to presenting problems of Type 1 diabetes.
  6. Parentheses have been added to the abbreviations of therapies.
3. References were updated to include PMID and doi numbers.

Thank you for publishing the manuscript in World Journal of Diabetes.

Yours sincerely
