

Certificate of Statistical Review

The statistical methods of this study "Abundance and Significance of Neuroligin-1 and Glutamate in Hirschsprung's disease" were reviewed. Statistical methods are adequate and appropriate and the statistical techniques are suitable. We also suggested some improved opinions and the authors have revised according to my suggestions.

School of Public Health of Shandong University

Professor Xue Fuzhong

A handwritten signature in black ink, reading "Xue Fuzhong". The signature is written in a cursive, flowing style.
