

This article was revised by Miss Ivashchenko, Anna, who is the assistant of professor Shulick, the chief of Surgery Dept. Colorado University Hospital, USA, part of her job is to enrich manuscripts for publication in the department for the writers who are none native English speakers. Professor Shulick is the honor professor of my hospital, so the article was referred to Anna with his suggestion. Professor Shulick is the chief or vice chief editor of many top journals of surgery, and his choice and recommendation should be reasonable.
