

February 26, 2015

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 16471-review.doc).

Title: Reversible sinusoidal obstruction syndrome associated with tacrolimus following liver transplantation

**Author:** Tian Shen, Xiaowen Feng, Lei Geng, Shusen Zheng

**Name of Journal:** *World Journal of Gastroenterology*

**ESPS Manuscript NO:** 16471

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated.

2 Revision has been made according to the suggestions of the reviewer: more detailed clinical information has been provided in the case presentation.

(1)The patient received prophylactic antibiotic, antimycotic and antiviral treatment following liver transplantation, which has been presented in the case report.

(2) It has been stated that no natural remedies had been used before current admission.

(3)The detailed clinical characteristics (including before and after defibrotide usage) such as graft function, coagulation and concentration of immunosuppressant have been provided in Table 1.

(4)Exclusion of possibility of viral hepatitis and acute rejection was explained by more detailed information.

(5)The pathological image of the graft at the time of transplantation has been provided as Figure 1A.

3 References and typesetting were corrected.

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

Tian Shen & Shusen Zheng
