

Format for ANSWERING REVIEWERS

March 16, 2015

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 16754-edited.doc).

Title: MicroRNAs as mediators of cardiovascular disease: Targets to be manipulated

Author: Seahyoung Lee, Eunhyun Choi, Sung-Man Kim, Ki-Chul Hwang

Name of Journal: *World Journal of Biological Chemistry*

ESPS Manuscript NO: 16754

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

(1) The manuscript entitled "microRNAs as mediators of cardiovascular disease: targets to be manipulated" provides an interesting insight into the potential role of microRNAs in cardiovascular disease, and also highlights the potential for targeting these small molecules in therapy. The manuscript will likely interest many readers, and can be published accordingly.

(2) The manuscript gives an interesting overview about the rule of microRNA in cardiovascular disease. It is well written and gives all main points. The make it more easy to read some shortening would be helpful.

-The authors deleted some parts of the manuscript so that the revised manuscript is more easier to read. Followings are some major changes made;

Page1, the phrase "All authors declare no conflict-of-interest" is added.

Page2, "recently highlighted" is removed and "be" is added

Page3, the first line of the 'introduction' has been changed. Line 6-7 of the section 'cardiovascular disease and microRNA' was removed.

Page4, the last part of the 'cardiovascular disease and microRNA' section was changed. Line 2-3, and 6-7 of the 'typical pattern of study on cardiovascular disease and miRNA' section were removed

Page5, line 2-3 from the top and line 2-3 from the bottom were removed.

Page6, line 2-3 of the 'alternative approaches to modulate expressions of miRNAs' section was removed. The first sentence of the 'conclusion' section was removed.

3 References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Biological Chemistry*.

Sincerely yours,
