---

Name of journal: *World Journal of Orthopedics*

ESPS Manuscript NO: 17163

### Answering reviewers

The manuscript has been improved according to the suggestions of reviewers:

As you mentioned, many of the treatment options you presented in your manuscript are not suitable in young patients. I recommend to include a table giving an overview of the options including outcome and age of patients treated. Besides a figure (or two) to illustrate the arthroscopic procedure of the latissimus tendon transfer would be helpful.

1 Table has been included.

2 One figure showing an intra-articular view from the lateral portal showing the fixation of the latissimus dorsi tendon to the greater tuberosity has been added.

Sincerely yours,

Filippo FAMILIARI, MD,  
Department of Orthopaedic and Trauma Surgery,  
"Magna Græcia" University of Catanzaro, Italy,  
Campus "S.Venuta", V.le Europa (Loc. Germaneto),
