### **STATISTICAL ANALYSIS**

The systematic review “Managements of recurrent hepatocellular carcinoma after liver transplantation: a systematic review” submitted to World Journal of Gastroenterology follows the statistical methods of a systematic review, in the literature search, data selection, collection, extraction, and evaluation. Only descriptive statistics has been performed. No meta-analysis was possible.

Maria Clotilde Carra , PhD

A handwritten signature in black ink, appearing to read 'M. Carra', written in a cursive style.
