

Response to Reviewers

Dear Editor,

Please find enclosed the edited manuscript in Word format (REVISED – Manuscript de novo neoplasms after LT – WJG.doc).

Title: Neoplastic disease after liver transplantation: focus on *de novo* neoplasms

Authors: Patrizia Burra and Kryssia Isabel Rodríguez-Castro

Name of Journal: *World Journal of Gastroenterology*

ESPS Manuscript NO: 17583

We would first of all like to thank the Reviewers for their evaluation and thoughtful comments and suggestions, which have contributed to the improvement of the manuscript. After thorough revision of the manuscript, all changes have been highlighted in yellow.

1 The section on PTLN has been extensively revised, including information on pediatric PTLN, specifying how it is more frequent than in adults, and how specific management strategies are required in the approach of these neoplasms. Please find the new paragraphs highlighted in yellow.

2 The section on Donor-transmitted malignancies has been extensively revised, including comments discussing the importance of considering donors with central nervous system malignancies, given the low risk of transmission, especially if certain conditions are met, and considering donor shortage and the possibility of dying on the waiting list. Please find the new paragraphs highlighted in yellow.

We sincerely hope the manuscript will now be suitable for publication and thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,
Patrizia Burra
