Dear Mr. Huang,

Attached you find the manuscript "Limited Resections for Duodenal GIST: Surgical Management and Clinical Outcome" (WJGS-178) with corrections according to your comments. Moreover we attached Figure 2 as a decomposable .ppt File.

Finally we guarantee that to our opinion the manuscript has reached or exceeded Grade B concerning language. It was revised by a native-speaking professional english science editor.

Sincerely,

J. Höppner MD, FACS
