

## Format for ANSWERING REVIEWERS

May 3, 2015

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 17892-review.doc).

**Title: Chemosensitization of HepG2 cells by suppression of NF- $\kappa$ B/p65 gene transcription with specific-siRNA**

**Author: Yun Shi, Si-Ye Wang, Min Yao, Wen-Li Sai, Wei Wu, Jun-Ling Yang, Yin Cai, Wen-Jie Zheng, Deng-Fu Yao**

**Name of Journal: World Journal of Gastroenterology**

**ESPS Manuscript NO: 17892**

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

(1) Application of two kinds of different liver cancer cell lines in experiment will be better, but there was only HepG2 in this manuscript. **Because the LO2 cells were as control liver cells**

(2) At least 3 candidate NF- $\kappa$ B/p65 siRNA should be designed. RT-PCR is performed to assess the knockdown efficiency of the candidate siRNAs. The best siRNA should be selected. **Yes, the best siRNA was used.**

(3) All the figures should be high quality. In Fig5 control group column may need to modify, because the maximum value of survival rate is more than 100%. **Yes, the Fig 5 has been changed, and the maximum value of survival rate is about 100 (from 96 ~ 102 %) in the control group.**

**(4) English writing has been corrected.**

3 References and typesetting were corrected. **Have done.**

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

*Deng-Fu Yao*, MD, PhD. Prof.
