

Santander, June 26<sup>th</sup>2015

Dear Editor,

Please find enclosed the edited manuscript.

**Title:** CLINICAL SIGNIFICANCE OF DONOR-SPECIFIC HLA ANTIBODIES IN LIVER TRANSPLANTATION

**Authors:** Antonio Cuadrado, David san Segundo, Marcos López Hoyos, Javier Crespo, Emilio Fábrega

**Name of Journal:** *World Journal of Gastroenterology*

**ESPS Manuscript NO:** 18366

**Column:** Topic Highlights

The manuscript has been improved according to the suggestions of reviewers:

1. Format has been updated and is highlighted in the attached reviewed file. Files related to academic rules and norms included in BPG's Revision Policies for Retrospective Study document have been added.
2. Revision has been made according to the suggestions of the reviewers:

(1) THIS PROPOSITION TO STUDY AND REVIEW THE REAL PROBLEM AFTER LIVER TRANSPLANTATION IS ACTUAL AND CAN BE PUBLISHED

We thank the comments and the effort reviewing our paper.

(2) Mostly emphasized topics in this manuscript were considered as vital. Though it is stated that >10000 DSA MFI value is risky in the liver transplantation. It would be more appropriate that it would be considered as >5000

We appreciate this kind comments and the effort reviewing our paper. We have modified >10000 DSA MFI for >5000.

Thank you again for taking our manuscript into consideration for publication in the *World Journal of Gastroenterology*.

Best regards,

A handwritten signature in black ink, appearing to read 'E. Fábrega García', written in a cursive style.

Emilio Fábrega García, MD, PhD.
