The manuscript has been improved according to the suggestions of reviewers:

1 Format is correct

2 The reviewer had no claims.

1) The review has had a lot of introduction about the indications, treatment schedule, the maximum number of repeated TACE procedures, therapy for various stages of HCC, combined regimens. It is important guidance to clinicians who well know about the therapeutic status of TACE for HCC under various stages. 2) I suggest that the article can be published in the form of review in World J Gastroenterology.

Thank you again for publishing our manuscript in the *World Journal of Hepatology*.
