

ANSWER TO REVIEWERS' COMMENTS

8TH October, 2015.

Dear Editor,

Please find enclosed the revised manuscript in word format (File name: REVISED MANUSCRIPT-18926 WJG) for your kind perusal.

Title: Metabolic Derivatives of Alcohol and the Molecular culprits of fibro-hepatocarcinogenesis: allies or enemies?

Authors: Alex Boye, Yuhong Zou, and Yan Yang

Name of journal: World Journal of Gastroenterology

Invited Manuscript ID: 02822548

ESPS Manuscript No: 18926

We thank the reviewers for their useful suggestions, which were that we should do minor language polishing. We have accordingly revised the manuscript. We would like to draw your attention to a difficulty we had when trying to use the crosscheck/ithenticate system to verify any trace of scientific misconduct. However, we were able to use the scholar.google.com to check using the revised title on the internet.

We thank you for publishing our work in the World Journal of Gastroenterology.

Sincerely,

Yan Yang
