

Dear Editor,

thank you for the evaluation of our paper titled "Psoriasis, NAFLD, and cardiovascular disease: three different diseases for a unique background".

We have done the revisions, as requested by the reviewers, as follows:

- 1) We have included an abstract, a core tip and keywords.
- 2) We have shorten the introduction as suggested.
- 3) We have unified the section of cardiovascular risk factors with the part of metabolic syndrome
- 4) We have revised references as suggested
- 5) We have removed the reference of Fig.1 from the subheading moving it in the main text
- 6) We have personally created Fig.1

We hope that our revised review is suitable for publication in World Journal of Cardiology

Best regards,

Dr. Giulia Ganzetti
