

Dear Dr. Ji,

Thank you very much for your expert's review. We revised our paper as reviewer's suggestion.

Concentrate more on the cytopathological and cyst analysis aspects

We revised our first section and removed several paragraphs about the imagines and EUS procedure.

Name of journal: **World Journal of Gastrointestinal Endoscopy**

Manuscript NO.: **19240**

2. Summaries the sections in one and two to provide a briefer description of the imaging and EUS procedure

We removed several paragraphs and have a briefer description of the imaging and EUS procedure.

3. Present the new classification as it has been agreed to (as I think non cytopathologists are not aware of these changes) and then justify the change in classification of IV category with pros and cons

I removed the modified classification in the writing content and discuss the classification of IV category with pros and cons in the several paragraphs.

4. HPB DOI:10.1111/hpb 12364 (gillis et al)

The paper was reviewed and a few sentences were added to the review.

Thank you very much for your help.
