

Biostatistics statement

The Editor,

World Journal of Methodology

Dear Sir/Madam,

Re: Review of Statistical Methods

I have carefully reviewed the entire manuscript titled “Photogrammetry as a tool for the postural evaluation of the spine: a systematic review”, by Tássia Silveira Furlanetto, Juliana Adami Sedrez, Cláudia Tarragô Candotti and Jefferson Fagundes Loss. The authors have conducted an in-depth review of the available literature on this topic. This systematic review revealed that the photogrammetry has been using in observational studies.

Considering that no meta-analysis was performed, I am satisfied with the fact that there was no need for statistical analysis of the data.

Yours sincerely
