

RESPONSE LETTER

REVIEWER'S COMMENTS

We thank the reviewer for his kind comments and useful suggestions.

In particular, even if his language evaluation “was *grade A: priority publishing*”, he underlined that “...*the manuscript has few grammatical mistake...*”. Actually a few mistakes were found by a Professor of English language at our University (see his declaration, as requested in step 8). The variations are highlighted in yellow in the updated version of the manuscript.

“There are a few flaws to be addressed.

1. *Page 6, Lanes 22 to 27: labeling of the literatures need to be modified as superscript*”. OK, it has been done.

2. *“Reference 61 and 74 is the same literature, please delete one”*.

The previous reference 74 was deleted.

3. *“The reference format should be consistent and refer to the journal”*.

The entire reference format has been modified and now it is consistent and written according to the journal.

EDITOR'S SUGGESTIONS

In the manuscript's title page we added:

1. running title
2. conflict-of-interest statement (a copy of the signed statement is provided in PDF format; see Document 5)
3. Open access.

In the revised manuscript:

"Don't need blank space between reference number and before words" - OK, blank spaces were deleted.

"We strongly encourage you add some Figures or/and Tables to your manuscript" - Given the nature of our review the addition of figures or tables seems redundant.

"Please add PubMed citation numbers and DOI citation to the reference list and list all authors. Please revise throughout"

- OK, it has been done.

Audio core tip was included (see Document 4).

Analysis of the final title by Google Scholar. - Ok, it has been done.

(see Document 7 that includes this Document 6)

Prevention of plagiarism. We performed a check of our revised manuscript to exclude plagiarism. The program you suggested is not available at our University; therefore, we used another program. As you can see in the attached document we did not find any plagiarism (see Document 7).
