

Manuscript 19431

Answer reviewer 02543890:

We appreciated your suggestion and restructured the introduction in accordance.

Answer reviewer 00030205:

Although already reported as sporadic cases, we collected and analyzed the data on eus-guided ethanol ablation in the specific subject of pNETs offering an up-to dated review. The case described is limited to one lesion, but offers a long term follow-up and to our knowledge represents the first experience of ethanol ablation of a cystic pNET.
