ESPS Manuscript NO: 19692

Dear Sirs, we thank you for your positive evaluation of our manuscript # entitled: “Relevant incidental findings at abdominal multi-detector contrast-enhanced computed tomography: a collateral screening?”. We revised the text according the indications provided by the reviewers.

Reviewer #1

R1.1 Core tip – 6th line-change to “contribute to increase in health care costs”, 7th line-Change to “ on the other hand, there is a risk of ...”

We revised the text according to suggestions.

R1.2 A table regarding specific disease entities found to incidentally involve the abdominal viscera may be added.

A new table (Table 6) reporting specific disease entities was included in the text.

Reviewer #2

R2.1 It's better to list the most common disease name of the involved organs in table 5
See #R1.2.

We hope that now our work can be accepted for publication in WJR.

Regards.
