

## Format for ANSWERING REVIEWERS

August 4, 2015

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 19886-edited.doc).

**Title:** Inferoposterior duodenal approach for laparoscopic pancreaticoduodenectomy

**Author:** Xiao-Ming Wang, Wei-Dong Sun, Ming-Hua Hu, Guan Wang, Ya-Qi Jiang, Xiao-San Fang, Meng Han

**Name of Journal:** *World Journal of Gastroenterology*

### ESPS Manuscript NO:19886

The manuscript has been improved according to the suggestions of reviewers:

1. Please write a running title of less than 6 words. See the format in the attachment. Thank you.

Answer: Corrections have been made.

2. Authors are required to make these statements in the manuscript's title page (please see sample wording in attachment). Besides, please provide these files, which are necessary for final acceptance, each in a separate PDF file, signed by the Correspondence author or a copy of Institution approval document(s)/letter(s) or waiver of confirmation. For sample wording and detailed information, please see the Revision policy in the attachment or Instruction to authors on our website. Thank you!

Answer: Corrections have been made.

3. METHODS should be no less than 140 words: You should present the materials and methods used for all of the data presented in the proceeding Results section of the abstract.

Answer: Corrections have been made.

4. RESULTS should be no less than 150 words: Observational and experimental results, including data, effects and outcomes, should be presented. You should present P values where appropriate. You must provide relevant data to illustrate how the statistical values were obtained, e.g.  $6.92 \pm 3.86$  vs  $3.61 \pm 1.67$ ,  $P < 0.001$ . Articles not meeting this requirement will not be accepted.

Answer: Corrections have been made.

5. Please reformat all the reference numbers (superscript with square brackets). Please check throughout. Normal line space is required. Please check throughout. Thank you!

Answer: Corrections have been made.

6. Statistical methods should be described when they are used to verify the results. Choose suitable techniques for the statistical treatments; for example, t-test (group or paired comparisons),  $\chi^2$  test, Ridit, probit, logit, regression (linear, curvilinear, or stepwise), correlation, analysis of variance (ANOVA), analysis of covariance, etc.

Answer: The Statistical analysis section has been added.

7. The COMMENTS section has been supplemented.

8. Please add PubMed citation numbers and DOI citation to the reference list and list all authors. Please revise throughout. For those references that have not been indexed by PubMed, a printed copy of the first page of the full reference should be submitted

Answer: The Statistical analysis section has been added.

In addition, other corrections are made.
