Dear Editor:

Thank you for your letter dated August 20, 2015. Enclosed please find a revised manuscript entitled "**Tilt Table Test Today – State of the Art**" by **Teodorovich and Swissa**

•
We wish to resubmit this revised manuscript for publication in the World Journal of Cardiology.

The authors are responsible for the contents and have read and approved the revised manuscript.

We hope that the revised manuscript is acceptable to the editors and to the reviewers.

We have no disclosures to declare.

Sincerely,

Moshe Swissa, M.D.

Dear Editor: The review article is good written. I think it is OK to be accepted after some words should be spelled out before being abbreviations such as CSM and ANS:

Thank you for your comment. This was corrected and words were spelled out.

Nicholay Teodorovich and Moshe Swissa report about Tilt Table Test Today – State of the Art. This article presents the usefulness of Tilt Table Test Today. But there are no new information:

Thank you for your comment. This is an invited review about the tilt table test. It accommodates the available knowledge about the subject. Of total 42 references, 19 are from the last five years.

Reviewed by 02634823

The article is interesting. It would be useful for readers to add some tables that would describe TTT better:

Thank you for your comment. The table was added.

Language check:

The requirement for obtaining a language quality certificate was surprising for us. Both authors did their postgraduate medical training in The United States for several years, the first author speaks English from his early childhood and the text has been reviewed by a native speaker of English before submission. Moreover, the all the reviewers agreed about the excellent quality of the language in this manuscript. We would prefer to skip this step, if possible.
