

## Format for ANSWERING REVIEWERS

August 23, 2015

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 20505-Review.doc).

**Title:** Role of virtual reality simulation in endoscopy training

**Author:** Louis Harpham-Lockyer, Faidon-Marios Laskaratos, Pasquale Berlingieri, Owen Epstein

**Name of Journal:** *World Journal of Gastrointestinal Endoscopy*

**ESPS Manuscript NO:** 20505

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 References and typesetting were corrected

3 We have revised our manuscript based on these suggestions and are providing point-by-point responses, as requested:

- We have updated our methods section with a more detailed description of our search strategy
- We have included a table with the various outcomes of studies evaluating the role of simulation in gastroscopy training
- We have provided some additional comments regarding the varied integration of VR simulation and the differences in VR simulation exposure that candidates had in different studies, as requested by the reviewers
- The definition of a 'novice' and an 'expert' varied considerably among different studies. We have provided some more details regarding the definition of 'expert' level in our revised manuscript
- In the tables summarising the different studies we have made a note of which outcomes were patient-related and which were simulation-related

We hope that we have provided satisfactory responses to the reviewers' comments and that your readers will find our revised manuscript interesting.

With kind regards

Faidon-Marios Laskaratos
