

31th August 2015

Thomas Y Ma, MD, PhD, Professor

President and Company Editor-in-Chief

Editorial Office of World Journal of Gastrointestinal Pathophysiology

Dear the editor of World Journal of Gastrointestinal Pathophysiology:

I am enclosing herewith a revised version of "Role of nitric oxide in the pathogenesis of Barrett's-associated carcinogenesis." The paper is submitted for publication consideration in the part of `Review article` as you recommended **(ID; 00048205)**. As you recommend, we revised this draft. All authors with no conflict of interest contributed to and agreed on the content of this manuscript. Neither the entire paper nor any of its contents have been accepted by any other journals nor is the paper being submitted to any other journal.

We believe that this revised version may be fully matched your request for publication in the part of `Review article` as you recommended **(ID; 00048205)**.

Please let me know of your decision at your earliest convenience.

Sincerely yours

Gen Kusaka, M.D, Ph.D,
