ESPS Manuscript NO: 20989

Manuscript Type: Review

Overview of embryonal rhabdomyosarcoma of the cervix in women over 40-years-old

Malala Razakanaivo, Nam P Nguyen, Juliette Thariat, Vincent Molinie, Anne-Therese Vlastos, Claire Verschraegen, Vincent Vinh-Hung

Reviewer's comments: The authors reviewed the literature in order to identify management guidelines for middleaged women affected by cervical embryonal rhabdomyosarcoma. Longterm survival was observed in patients receiving multimodal treatments. The authors claimed that the collaboration in multiple institutes is necessary to determine optimal management for this rare disease. This manuscript provides useful information to the medical students, clinicians, and researchers in this field, therefore, is acceptable for publication in World Journal of Obstetrics and Gynecology. That is all.

Classification: Grade B (Very good)

Language evaluation: Grade A (priority publishing)

Conclusion: Accept

Response to reviewer:

We are most grateful for the kind evaluation that Reviewer granted us.

We have further improved the manuscript with help from the Editorial Service.

Furthermore, the manuscript's revision received major contribution from Dr Verschraegen, medical oncologist, and Dr Vlastos, gynecologist obstetrician. Both of them are recognized experts in their respective fields. By content and by authors, we believe that the review has become truly multidisciplinary.
