

Bragança Paulista, Brazil, 2015, October.

Response letter

We are really thankful for the favorable review consideration.

The change was made to fulfill the request. It appears highlighted in the text.

Best regards

Denise Priolli and Authors

Reviewed by 00742507

- 1) Title - delete the "Literature"

It was done

- 2) end of Introduction - "this review investigated..." it is a review, not an investigation.

It was changed to "This review contributed to clarifying "

- 3) IQ and cancer - the readers know the definition of cancer, delete the first sentence

It was done

- 4) Division into individual cancer types is confusing, particularly when only one reference exists.

The choice of dividing the text into topics was made in order to facilitate the reader's access to effect of flavonoid on a specific cancer type.

To clarify we inserted "There are some studies about the effect of flavonoids on specific cancer types:".

- 5) Figure 5 is chaotic and does not add any information. Should be deleted.

Figure was deleted.
