ESPS Manuscript NO: 21349

The manuscript has been improved according to the suggestions of reviewers:

Reviewer 1: Although the paper is well presented, the presented data and conclusions are of limited value to the general readership (except Korea) of the Journal.

→ I think this study is innovative and would be interesting to see if the findings are reproducible in other countries where BE is not as common as in the West.

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,
