

In this study, SPSS Statistics for Windows, Version 17.0 (SPSS, Inc., Chicago, IL, USA) was used for analyses. A *t*-test was used to analyze normally distributed data and a Mann-Whitney U-test for other types of distributions. A chi-square test was used to analyze count data. $P < 0.05$ was considered to be statistically significant. The survival curves for two groups were used Kaplan-Meier method, and the log-rank test was applied to analyze the differences between the results.
