

To whom it may concern:

Below is a response addressing comments by peer-reviewers and editor regarding the submission of the article entitled, "Impact of Cardiac MRI in non-ischemic cardiomyopathies" to the *World Journal of Cardiology*.

In response to multiple reviewer comments regarding the need to succinctly summarize cardiac magnetic resonance imaging findings and main implications on clinical assessment and outcome for the presented non-ischemic cardiomyopathies, a summary table (Table 1) has been added.

In response to a reviewer's comment regarding addressing the potential limitations of cardiac magnetic resonance imaging, a section at the end of the manuscript has been added describing some of the main limitations and challenges in the evaluation of non-ischemic cardiomyopathies.
