

**Name of Journal:** *World Journal of Methodology*

**ESPS Manuscript NO:** 21690

Dear Editor-in-Chief and Science Editor,

Thank you for evaluating the related manuscript for to be publised in the *World Journal of Methodology*.

Revisions according to the requirements of the reviewer(s) and the editor(s) are as follows (C; correction, R; Response):

C1: A well written manuscript for some grammar and editing corrections particularly for abbreviations.

R1: English language editing revision is declared by an attached language certificate. Abbreviation errors are corrected.

C2: Please offer the postcode, signed pdf file of the conflict-of-interest and provide an abstract and core tip in the text session of the manuscript.

R2: The above mentioned parameters are all provided according to the requirements of the science editor.

C3: Please list 5-10 key words, selected mainly from Index Medicus, which reflect the content of the study.

R3: The key words are selected from Index Medicus.

C4: Please offer the audio core tip.

R4: The audio core tip is provided according to the requirements of the science editor.

C5: Please add PubMed citation numbers and DOI citations to the reference list and list all authors.

R5: The available PubMed citation numbers and DOI citations are provided according to the requirements of the science editor. The additional DOI citations

belonging to the reference numbers 38 and 51 are found, and the missing characters in DOI citations belonging to the reference numbers 22 and 30 are completed. For reference numbers 4, 33, 35, 39, 42, 44 47, 50, and, 53 the additional achievable PubMed citation numbers are provided. All authors are listed.

I hope that the revision will fulfill the expectations for it to be published in the *World Journal of Methodology* as a minireview article.

Best Regards,

Prof Dr Onur Özgenc¸, M.D.

Answer to chief editor:

Dear Fang-Fang Ji, Science Editor,

The enclosed article is revised according to the comments of the chief editor:

- 1) The entire paper has been gone through proofreading and further effort has been given for its language editing correction by the author.
- 2) A scheme expressing the triangular relationship between the patient, pathogen, and antimicrobials is performed.
- 3) The word "directly" is replaced by "intentionally" whenever appropriate.

Thank you very much for your efforts for the crosschecking.

Best Regards  
Onur Özgenç
