### Response letter to reviewers:

Dear reviewers,

We have been careful to revise our manuscript again to modify the English language that were proposed by you, based in the edition suggested by our English reviewer.

We set our references and applied the format of the World Journal of Experimental Medicine. We also check our text for avoid plagiarism, but for problems of our Turnitin university signature we could not make use of iThenticate software as was suggested by the editor, and instead we used the online software Plagium.

Thanks all of you for your suggestions and considerations.

Best regards,

Camila I. Morales
