

Answers to Reviewers

The manuscript have been revised according to the reviewer's comments as follows:

1- Each section was summed up by the addition of "mini conclusion" sections to the end of each part. The points open to future research were emphasized in this context.

Lines 230-233, 342-352, 409-415, 527-533

The language have been edited by a native speaker from Scribendi (www.scribendi.com) and I hope this will be sufficient.

2-A new discussion section added up to the end of the manuscript taken the Guidelines of European Society of Hypertension (ESH) and the Eurpean Society of Cardiology (ESC)and paper of Scicchitano et al. into account.

Lines: 539-548
