Heparin-Induced Thrombocytopenia (HIT II) in solid organ  
transplant recipients: the current scientific knowledge

Dear Editors,  
Dear Lian-Sheng Ma,

According to the documents sent back after the reviewing process  
the reviewers do not have any queries that have to be answered.

We changed the manuscript according to the format and style  
guidelines and submitted the figures and the table as separate  
files.

Yours sincerely,

Volker Assfalg
