| Introduction section -the last sentence is unclear, please rewrite it | By the line, authors meant that the entity of xanthogranulomatous pyelonephritis was well known and the morphological appearance of xanthogranulomatous cholecystitis looked similar, leading to its present nomenclature. However, in acceptance with the reviewer this line has been removed in the present manuscript. |
| MRI section - ...77,7% of patients with XGC ..., out of total number of examined patients. | Dubious line in the MRI section has been corrected and rewritten as advised by the reviewer. |
| Section management - describe in detail how to perform FNA (maybe under the guidance of ...). | In the management part FNAC has been elaborated upon in keeping with reviewer's comments. |
