

Dear Editor,

The article was reviewed in terms of content and language according with reviewer's comments. Details of each comment and answer are written below.

**Reviewer 1#**

**COMMENTS TO AUTHORS**

Interesting review paper on the effect of the different types of herpes virus as an infective agent to the oral cavity. The authors have provided an extensive and up to date literature review on the current literature regarding the subject. The review is well written, the references accurate and recent, the language acceptable and the table supportive to the text. The review paper can be accepted for publication without changes.

**Answer:**

No changes are requested. The language revision was made by a native speaker through English editing company.

**Reviewer 2#**

**COMMENTS TO AUTHORS**

The manuscript is well written with clear flow of thoughts. There are spelling mistakes and grammatical errors which need to be corrected. After these corrections the manuscript seems suitable for publication.

**Answer:**

The language revision was made by a native speaker through English editing company.

Due to only language corrections are requested, no significant changes were made in the manuscript.

Best regards,

Prof. Ronaldo L. Thomasini, PhD., Corresponding author.
